ISA Definitions and Considerations

In-seat Attendance (ISA)

- A measure of daily attendance that can be applied to an individual student or a group. The formula for ISA rate is: $(\text{SUM}(\text{membership days of each student}) - \text{SUM}(\text{absences by those students})) / \text{SUM}(\text{membership days of each student})$

Key Outcome 1: In Seat Attendance

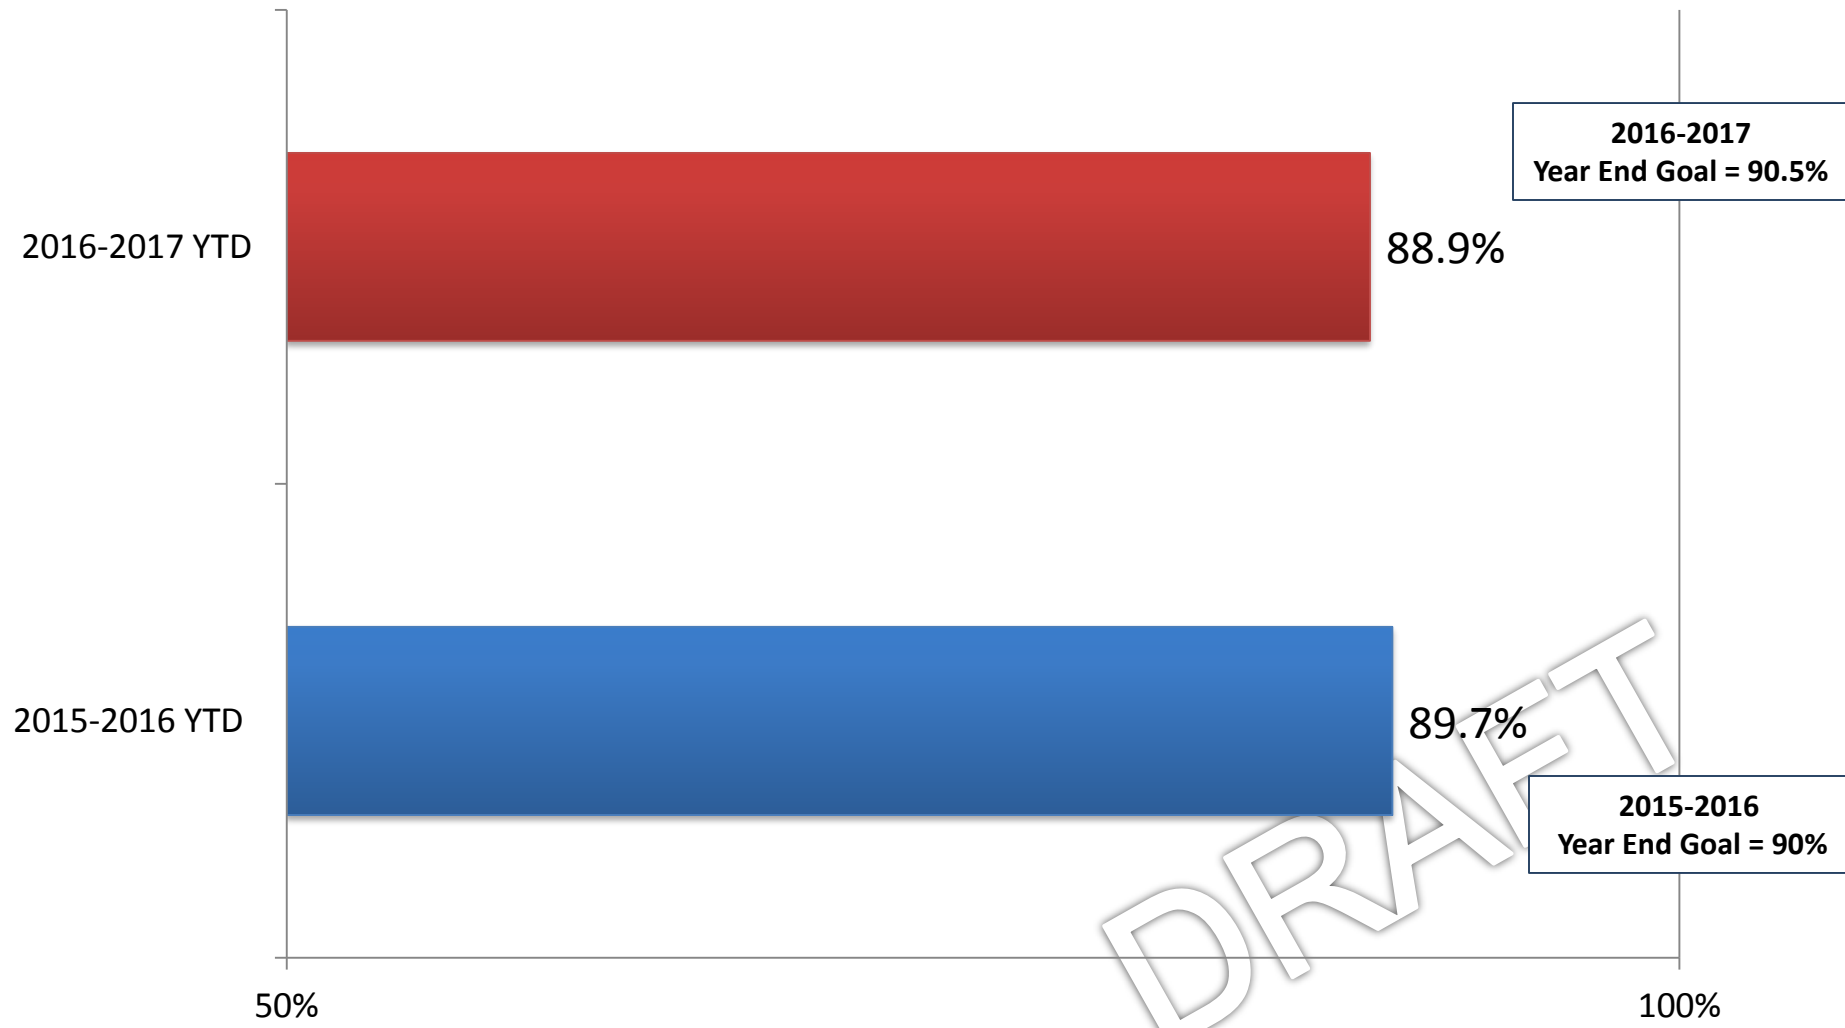

DRAFT

1. In-Seat Attendance (ISA) Highlights

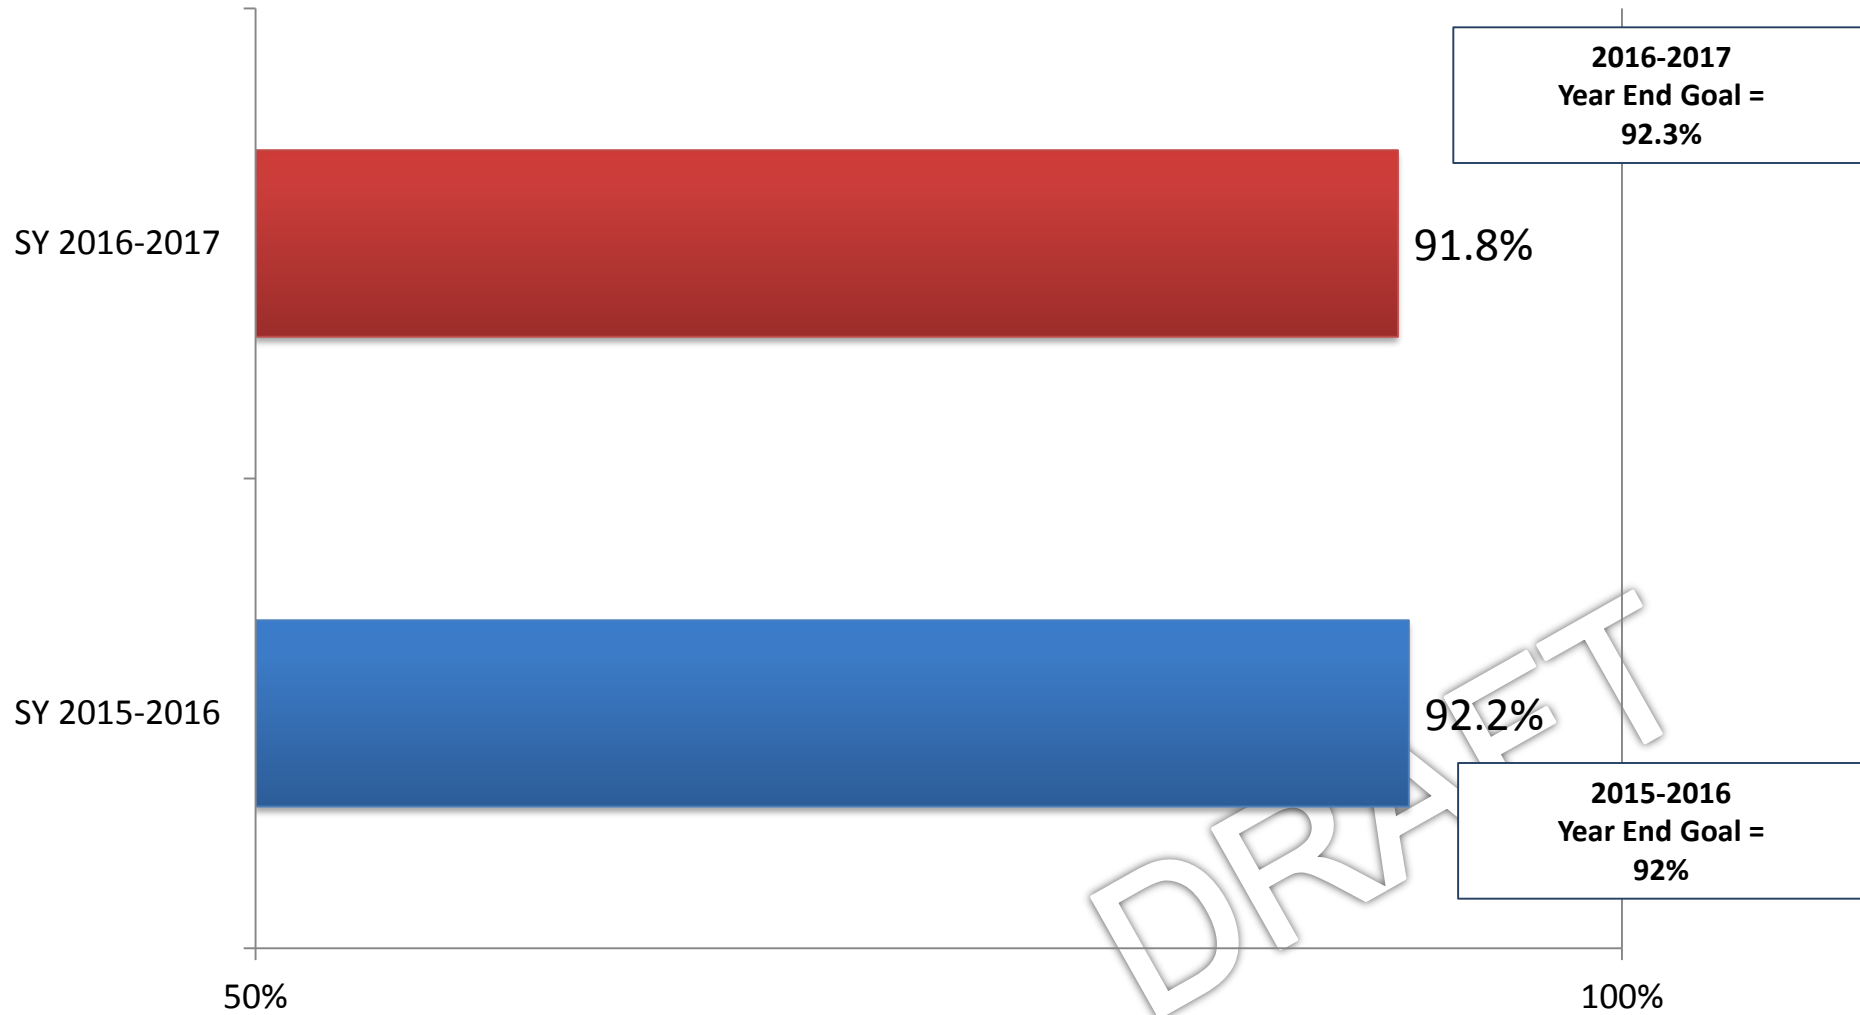

- DCPS' 2016-2017 (SY) ISA rates are 88.9% (1.6% below their goal of 90.5%) and 0.8% lower than 2015-2016 (SY) rates.
- Public Charter School sector's 2016-2017 (SY) ISA rates are 91.8% (0.5% lower than their goal of 92.3%) and 0.4% lower than 2015-2016 (SY) rates*.

Chronic Truancy

Methodology Transition and Definition

- In 2015, the Truancy Taskforce identified that this calculation was being implemented using different business rules across sectors.
- Specifically, not all students ever truant during the school year were included in the numerator (some students leaving the school were missing) in some cases; and some students ineligible to be truant (not of compulsory age) were included in the denominator in some cases.
- The Truancy Taskforce agreed upon a uniform chronic truancy rate methodology, and Council committed the methodological clarification in legislation.
- The uniform chronic truancy rate is now defined as: “The incidence of students of compulsory attendance age, as defined by D.C. Official Code § 38-202(a), enrolled at a school at any point in a given school year who are absent without valid excuse, as defined by 5-A DCMR § 2102.2, on ten (10) or more occasions within a single school year, divided by the total number of students of compulsory attendance age ever enrolled during the corresponding school year.”
- In 2016-17, District policy mandated that schools could not accept excuse notes more than 5 days following an absence

Chronic Truancy DCPS

- The SY 2016-2017 (SY) chronic truancy rate for DCPS is 5% higher than the SY 2015-2016 (SY) rates.
